Dewatering Tubes

Spinpro is a factory direct source for polypropylene and polyester geotextile dewatering tubes and dewatering bags. Our

high capacity SludgePro geotextile tubes are available in hanging bags for testing, cubic yard bags and roll off dewatering bags for smaller projects. Our dewatering tubes consist of stock and custom sizes up to 90' circumference X 300' long.

Our products and services also include liners, geo grid, geo membranes, silt fence, erosion control, turbidity curtains and silt screens. We have full service capabilities including project design, project management, dredging, pumping, presses and centrifuges.

Products & Services

High Performance Polymers

Our high performance dewatering polymers are custom blends developed specifically for dewatering equipment and geotextile dewatering tubes. Our application specialists will chose the absolute best chemical treatment for your specific type of sludge and dewatering equipment whether it is a centrifuge, belt press, filter press, clarifier, DAF or geotextile dewatering tube. Send us a sample of your sludge for a dewaterability evaluation.

Centrifuges & Dredges

We have both new and pre owned equipment available as well as rental units for individual projects. Please call to discuss our current inventory or to get pricing on new equipment. From Individual units to complete "Turn Key" Packages we will set you up with the right equipment for your dewatering needs.
